

SALISBURY HOSPITAL - PAEDIATRICS PLAY AREA

J & J Carter were tasked with providing a Tensile Fabric Shade Canopy for the paediatrics play area at Salisbury hospital in Wiltshire.

The 72m² Tensile Fabric Canopy was installed over the play deck, featuring a non-combustible membrane with high translucency, as per the client's request. ATEX Silicone Coated Glass Fibre from Valmeira was chosen for the canopy itself. The fabric is woven and coated in Sherbourne, Dorset, and holds a 15-year warranty.

The project was completed working alongside Devereux Architects Ltd and main contractor's ISG, both specialists at what they do with award winning results.

KEY FACTS

LOCATION: United Kingdom

STRUCTURES: Tension Structure

INDUSTRY: Healthcare

ROOF FORMS: Hypar

MATERIALS: Silicone Coated Glass Fibre
