

THE MILL HOUSE HOTEL

OUT WITH THE OLD, IN WITH THE NEW

J & J Carter were contracted by Loddon Hotel Ltd., owners of The Mill House Hotel to replace their existing marquee facility with a modern structure. The old marquee, measuring 30 ft. x 75 ft. was a classic 1980's aluminium clearspan marquee which was fine at the time it was installed; but not by today's standard.

With clients ever increasing levels of expectation, and today's high standards for weddings and corporate events, there was a requirement to replace the marquee with a facility that can provide not only comfort, but also an environment suitable for food preparation. The new 9m x 22.5m clearspan structure was not only designed to fit within the existing site constraints to comply with planning permission; but also upgraded with an insulated translucent thermo roof system, solid UPVC side walls, double glazing, bi-folding windows, internal decorative lining and segregated kitchen area.

All these upgrades help provide for a facility which fulfils environmental requirements for reduced use of heating fuel. The hotel have also installed specialist acoustic control systems to minimise external noise from the music system and air-

conditioning.

WHAT THE MILL HOUSE HOTEL SAID:

"We can't thank Robert and Ollie enough for their tireless patience and professionalism from the planning stage through to installation. From minor adjustments, co-ordination of the work force to ensure we have a Marquee fit for purpose. The end result is fantastic.

Their expertise of their product is faultless with a bespoke structure commissioned due to planning constraints Roberts team really do think out of the box to make things work." - Mark & Kim Pybus owners of The Mill House Hotel

EXPERT MARQUEE MANUFACTURERS

J & J Carter are leading marquee manufacturers with an eye for detail and commitment to quality. All our marquees are compliant with safety standards and span up to 25m. [Discover our range of marquee structures.](#)
